Maximum transparency that unites the inside and outside: The Leicht reference "Swabian Alb" embodies holistic kitchen and living space planning. Photos: Tim Buchmann

A glazed cube provides generous views and views with maximum transparency. This makes the private house on the edge of the Swabian Alb both clear and elegant, both inside and out. Integrated into the spacious living area is a holistic kitchen space concept by Leicht.

In the foreground of the kitchen planning is the island with an unrestricted view of the green garden. The rooms blend seamlessly into one another - lightness and an airy atmosphere characterize the predominantly white interior.

But see for yourself:
