The "Architects & Designers Building" in the heart of New York is considered one of the top addresses for kitchens, bathrooms and exclusive furniture. Now Nolte Küchen belongs to the ranks of well-known brand manufacturers who are represented there. The representative studio on the 10th floor of the A & D building in the middle of Manhattan is about 180 square meters. According to a press release, it should serve as a source of inspiration for design enthusiasts and be a point of contact for specialist retailers and project businesses. "With New York we have opened up an important design hotspot. From here we will further expand our presence in the US market. We are pleased to have a long-time partner at our side who knows our product and the market perfectly," says Managing Director Eckhard Wefing.
